eGlobal aims to provide you with the data you need when you need it, looking for the best ways to help you with your business, eGlobal is here to serve you.

## BUSINESS INTELEGENGE

- KPI DASHBOARDS.
- STAKEHOLDER PROFILING.
- RELIABILITY & EXTENSIBILITY .
- COLLABORATION FEATURES.
- DATA INTEGRITY.

eGlobal Intelligence™ is an all encompassing Business Intelligence solution, geared entirely to you providing you with the tools you need to manage and run your business. eGlobal provides up to date accurate data, displayed clearly for quick referencing and providing the functionality for you to drill down to lower levels of detail when the need arises.

## Giving your business the intelligence it needs

### KPI DASHBOARDS

By providing you with clear and concise business dashboards, connected to relevant and timely data, we are able to provide you with key performance indicators, allowing you to monitor the health of your organization. The dashboards containing easy to understand information in the form of charts and graphs, are customized to your business needs, with indicators tailored to your particular business and sector.

### STAKEHOLDER PROFILING

In order to understand your business, you have to understand your stakeholders, the people who really count. By profiling your stakeholders, grouping them by demographics, recognizing whether two of the same stakeholders are in fact the same person and locating them geographically, you will be able to see a holistic view of all your entities. Allowing you to customize marketing drives and better understand those of the greatest importance to you.

### RELIABILITY & EXTENSIBILITY

eGlobal is built on the proven platform of OpenEnterprise™, ensuring application reliability and allowing for the plugging-in of functionality with virtually no effort.

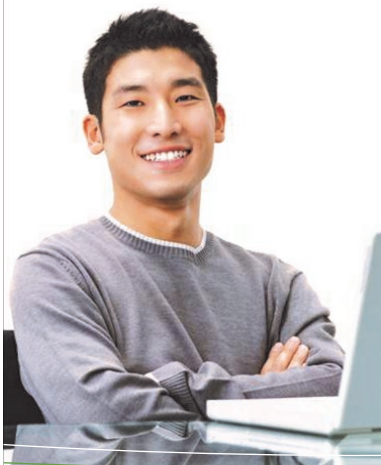

### DATA INTEGRITY

To avoid the common problem of “garbage in garbage out” our application filters and formats incoming data, ensuring matching and data visualization is understandable.

### COLLABORATION FEATURES

Utilizing the inbuilt collaboration features of OpenEnterprise™, you will be able to share dashboards between users, make comments and suggestions and hold virtual meetings on live data components.

eGlobal is here to provide for all your business intelligence needs, we do the research so you don't have to, by keeping ahead we keep you ahead of your market.

## EXTENDED FUNCTIONS

- ENTERPRISE SEARCH
- DATA CONNECTORS.
- SOFTWARE AS A SERVICE
- ANALYTICAL PROCESSING.
- REAL-TIME DATA PROCESSING.

eGlobal Intelligence™ provides a variety of functionalities in order to ensure that all of our customer's business needs are met. By allowing our customer to access all of their data sources, in a number of different ways, we are able to empower you to make critical business decisions, whether using our applications or yours while connecting to our systems.

## The end of the line for "lack of information"

### ENTERPRISE SEARCH

Through the use of our various data connectors, eGlobal allows for the indexing of your data from virtually anywhere. Once indexed the data is searchable both through content and titles, allowing you to look for a keyword, or an entity across all of your data sources, from your databases to your file systems and websites. This powerful search gives you a single point of access for all of your data and view the relationships between each source of data you have.

### DATA CONNECTORS

To provide a holistic view of your company and its data, eGlobal comes with a series of data connectors, allowing for data to be brought into your BI application from a diverse range of sources. We provide data connectors for numerous databases, authenticated websites, file systems, Lotus Notes databases and many more. If we can connect to it, we can bring it to the forefront of your business, allowing you to take into account all of your data when making decisions.

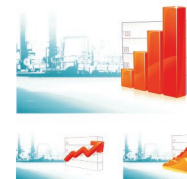

### SAAS

eGlobal Intelligence can also be provided to you as SaaS (software as a service). This allows you to cut down the cost of your IT, without the need for a dedicated team. We can also provide a easy to use data service, allowing your applications to access and query our system.

### ANALYTICAL PROCESSING

By analyzing you data, through the use of advanced financial mathematical algorithms, eGlobal Intelligence can provide you with forecasts on your data and monitor for anything out of the norm.

### REAL-TIME DATA PROCESSING

In order for you to make the right decisions at precisely the right time, we can provide you with eGlobal's full functionality on a real-time basis.

**etapix** WE PROVIDE OUR CUSTOMERS WITH THE BEST SO THAT YOU CAN BE THE BEST.  
We are constantly looking at ways to evolve our product, using cutting edge technologies for your benefit, as they come
